MINT ERROR NEWS MAGAZINE™

Bringing the latest mint error news to the collector.

Mike Byers, Publisher & Editor, Welcomes You!

Welcome to Mint Error News Magazine, bringing the latest mint error news and information to the collector. This is our 22nd year bringing you both an online PDF magazine and the Mint Error News website. There are over 1,500 articles, features, discoveries, news stories with mint error related info from the United States and around the World. Our website, minterrornews.com, has become the most popular and informative Internet resource for mint errors and is read by thousands of dealers and collectors.

Over the last 22 years with the advent of the internet millions of collectors have flocked to online auctions and dealer websites. Many people connect to various online forums and clubs to share knowledge and learn about Mint Errors. Everyone, including dealers, collectors and even investors have instant access to information as never before. The Mint Error market has experienced an explosion in collector interest over the last 22 years.

Time and again, rare and unique Mint Errors in the numismatic market have made headline news. Authentication and certification of Mint Errors is now commonplace. In 1991, ANACS was the first to authenticate, grade and encapsulate major Mint Errors. In 1999, PCGS and NGC began certifying Mint Errors. Major Mint Errors are now pursued, collected and traded just like patterns, territorial Gold, colonials and other interesting segments of numismatics.

In 1975, I purchased a 1900 Indian Head Cent struck on a \$2 1/2 Indian Gold blank planchet for \$7,750 at a major coin auction. That price ranked among the top five ever realized for a Mint Error that few dealers or serious collectors would even consider. At that time price guides for Mint Errors were nonexistent and today that Indian Head Cent struck in Gold is certified MS65 by PCGS and is valued at six figures.

Jim Stoutjesdyk

Jim Stoutjesdyk was named Vice President of Heritage Rare Coin Galleries in 2004. Since coming to Heritage in 1993, Jim has assumed a wide variety of responsibilities. He initially was hired as the Gallery Manager for Heritage's retail showroom. For several years he helped to develop Heritage's retail clientele and placed millions of dollars worth of rare coins with collectors. Jim's interest turned to wholesale trading and he quickly became a familiar face at coin shows across the nation. As Vice President, Jim's duties include buying and selling millions of dollars worth of rare coins each month, pricing all of the new coins available for sale each day, and overseeing the daily operations of the rare coin department. In 2019 the American Numismatic Association awarded Jim the very prestigious Doctor of Numismatics honorary degree.

Jim Stoutjesdyk is a Consultant to Mint Error News for U.S. Coins, Unique Items, Patterns and Mint Errors.

Heritage Auctions is the largest collectibles auctioneer and third largest auction house in the world, as well as the largest auction house founded in the U.S. We are also the undisputed Internet leader in our field, with more than 1.75 million online bidder-members registered on HA.com from all 195 countries. This loyal and growing community of collectors is a testament to the usefulness of our website, our reputation for professional business practices and our vast expertise in the field of art and collectibles.

Established in 1976, Heritage offers a wide range of U.S. & World Coins, Rare Currency, Fine & Decorative Art, American Art, Illustration Art, Modern & Contemporary Art, Urban Art, Comic Books & Comic Art, Movie Posters, Entertainment & Music Memorabilia, Jewelry & Timepieces, Luxury Handbags, Sports Collectibles, Historical & Political Memorabilia, Rare Books & Manuscripts, Ethnographic Art, & Space Exploration Memorabilia, Civil War Memorabilia, Photographs, Nature & Science, Fine and Rare Wine, Luxury Real Estate, Pop Culture Collectibles, and more.

Dave Camire is considered an authority on modern minting technology and production, specializing in mint errors and Chinese coins. He has visited many mints, both domestically and internationally, which is not only insightful but useful in his role as NGC Modern World Coin Grader and Finalizer. His knowledge of the minting process is helpful in distinguishing mint defects from damaged coins and establishing a coin's authenticity and grade.

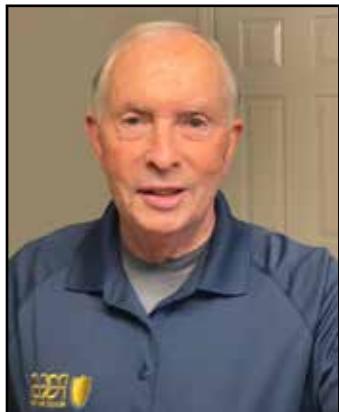

Dave co-authored *100 Greatest U.S. Error Coins* and has contributed to such numismatic publications as Coin World (honored with being listed as one of the 100 Most Influential People), COINage, Numismatic News, The Numismatist and the Red Book. He has been featured on National Public Radio (NPR) and seen on Good Morning America and the Discovery Channel.

Dave Camire

Dave is also President of Numismatic Conservation Services (NCS). With his knowledge and expertise in coin conservation, he has been an active volunteer at the Smithsonian Institution's Museum of American History, helping to preserve the National Numismatic Collection and establishing key numismatic displays at the museum. A collector at heart, he has been collecting since he was 13 years old.

Dave Camire is a Consultant to Mint Error News for Mint Errors, Patterns and Die Trials.

Mike Faraone is the owner of Mike Faraone Rare Coins in Las Vegas, Nevada. He previously was a grader at PCGS for 12 years after 11 years at ANACS.

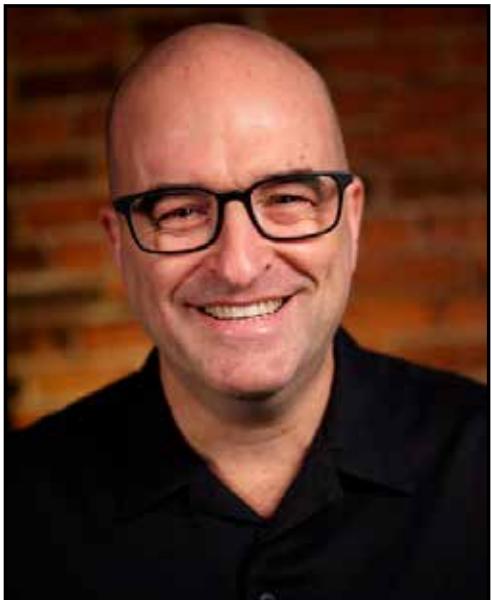

He has taught grading at the ANA Summer Seminar for twenty years. Mike has lectured on Mint errors and Counterfeit protection at numerous coin shows across the country. He is a previous president of the National Silver Dollar Roundtable and served as editor of the NSDR Journal for over twenty years. Mike can be reached via e-mail at: mfaraone@hotmail.com.

Mike Faraone is a Consultant to Mint Error News for Mint Errors, Patterns and Die Trials.

Ian is president and co-founder of GreatCollections Coin & Paper Money Auctions. From a young age, Ian was interested in collectibles and started working on weekends for a stamp dealer in Sydney, Australia at age 14. From there he learned about auctions at Stanley Gibbons Australia, personally handling many important sales including the Purcell Collection of Kangaroo and Map Series, the Mackey Collection of Australian States/Pacific Islands and the Morrison Hill China Collection. Ian also put together the company's first paper money auction featuring one of the finest New Zealand bank note collections ever formed.

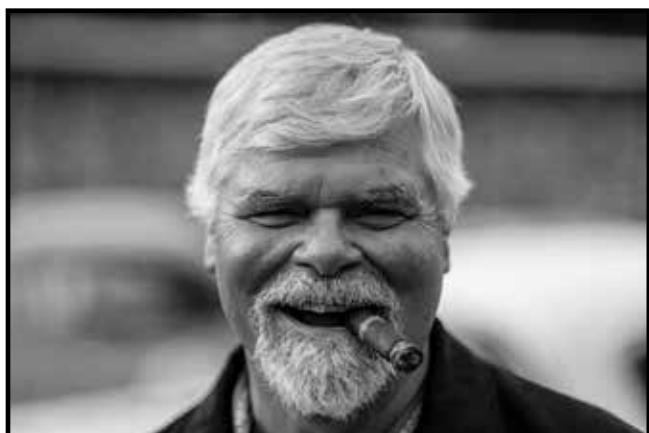

Ian is a member of the prestigious Professional Numismatists Guild, member 785 and abides by the PNG Code of Ethics. In 2021, CoinWorld Magazine named Ian one of the most influential people in numismatics. Contact Ian Russell at ian@greatcollections.com.

Ian Russell

Great Collections holds the record auctioning the famous \$1 Sacagawea obverse muled with a Quarter reverse for \$194,062.50.

Ian Russell is a consultant to Mint Error News for Error Coins and Patterns.

Jim Gately

Jim Gately is the owner of the #1 ranked PCGS registry set of Buffalo Nickels. He also has other registry sets with PCGS.

He purchased the unique 1913 Gold Buffalo Nickel from Mike Byers for \$400,000 and proudly included it in his set.

Jim is an expert on 20th Century U.S. coinage with an emphasis on Buffalo Nickels. He is a consultant to Mint Error News for Double Dies and Overdates.

UNIQUE GOLD PIEFORT NÜRNBERG “1700” 2 DUCATS

by Mike Byers (mikebyers.com)

Unknown to the numismatic community both in Europe and in the U.S., this unique gold klippe piefort presentation piece surfaced in 2007 for the first time.

UNIQUE GOLD PIEFORT - NÜRNBERG “1700” 2 DUCATS

The German auction house of Künker featured this 2 Ducat in their June 2007 sale (#125, Lot #976). It was described as of the greatest rarity, and sold for the equivalent of \$10,750 twenty years ago. It is unique to date, and is unlisted in every reference book including Keller, Erlanger, Krause & Friedberg. This coin is an extremely rare Gold Piefort, a presentation piece struck on a planchet with double the weight and thickness of a regular issue.

This was an astonishing price since at the same time, Nürnberg 2 Ducats dated 1700 and also struck from 1755-1764, featuring the famous design of the Paschal Lamb, were selling for around \$1,000. This unique 2 Ducat klippe realized ten times that of a regular circulation strike round 2 Ducat.

The regular 1700 dated round 2 Ducat issued for circulation

has a weight of 7 grams, with a composition of .986 gold and a diameter of 22 mm. Krause lists this as KM #259 with a catalog value of \$1,650 in XF from 10 years ago. Friedberg lists this as Fr-1882 with a catalog value of \$1,250 in EF.

The special issued non-circulation 1700 dated square 2 Ducat has a diameter of 30mm by 30mm and is considerably rarer. Krause lists this as KM #260 with a catalog value of \$6,500 in XF from 10 years ago. Friedberg lists this as Fr-1884 with a catalog value of \$7,000 in EF. Most known are damaged, bent, holed or scratched.

This unique presentation gold klippe piefort is twice the weight of a 1 Ducat and twice the thickness. Struck by 1 Ducat dies to the exact weight of a 2 Ducats, this piefort was designated by PCGS as a 2 Ducat denomination. Künker

UNIQUE GOLD PIEFORT - NÜRNBERG “1700” 2 DUCATS

also cataloged it as such. The exact weight is 6.91 grams, with a diameter of 20mm by 20mm. It is in uncirculated condition with beautiful surfaces and fully struck with original gold and orange toning on both the obverse and reverse. It is dramatic and visually impressive since it wasn't struck on the larger diameter planchets used for the round 2 Ducats for circulation or the square 2 Ducat klippe pieces.

Fast forward to today, round 2 Ducats certified by NGC and PCGS in MS 61 through MS 63 sell from \$9K-\$23K. The square 2 Ducats mirrored the same meteoric rise in price as the round 2 Ducats. Square 2 Ducats certified by NGC and PCGS sell for more than the round ones because they are much rarer. Unfortunately, most known are damaged, bent, holed or scratched. Heritage Auctions has handled only one example and Künker has

handled only four examples. The 2 Ducats dated 1700, whether struck in 1700 or in 1755-1764 sell for the same price.

Even rarer are 2 Ducats struck by 3 Ducat dies. Most known are damaged, bent, holed or scratched. Friedberg catalogs these as \$5,000 in VF and \$8,000 in XF. A round 3 Ducat struck by 2 Ducat dies is listed in Friedberg as 1881a and described as Unique. In 2026, it sold in a Frühwald auction (Auction 175, Lot 39) for EUR 16,605 (\$19,427) including the buyer's commission. It is the size of a 2 Ducat, but it is on a heavier and thicker planchet with a weight of 10.45 grams (3 Ducat weight).

This amazing gold klippe piefort from Nürnberg stands alone as a unique presentation piece from a few centuries ago and belongs in a world class coin collection or in a numismatic museum.

EXTREMELY RARE 1861-D \$1 GOLD LAMINATION MINT ERROR

by Mike Byers (mikebyers.com)

Although authenticated and certified by PCGS as a planchet flaw, in AU condition, and encapsulated in a PCGS Genuine holder, there is more to the story... It is actually a Mint Error and the accurate terminology is lamination.

EXTREMELY RARE 1861-D \$1 GOLD LAMINATION MINT ERROR

Realizing \$26,400 in August 2024 in the Stacks Bowers August 2024 Global Showcase Auction - Session 3 - Rarities Night (Lot #3274), it is one of the bargains from the auction for several reasons: rarity, condition and price.

Stacks Bowers described it as “minimally marked and unusually well-composed for the assigned grade, wispy hairlines are noted solely for accuracy.” Upon examination of this coin in hand, I would assign a conservative numerical grade on a minimum of AU 55. Several world class experts specializing in early Branch Mint U.S. gold coins, upon viewing this coin in person, graded it AU 58 and agreed that it is a mint error and belongs in a regular PCGS holder

with a designation of mint error and a numerical grade.

Coin World featured this coin in an October 27, 2024 article after it sold in Stacks Bowers. *Coin World* stated that “in contrast to many Details grades seen on coins, this 1861-D Indian Head gold dollar’s Details grade is due to a Mint made error, rather than improper handling.”

Coin World article...](#)

Recently, Heritage Auctions sold two 1861-D \$1 gold coins, certified AU 55 by PCGS, for \$72,000 and \$78,000. Additionally, Heritage Auctions sold two 1861-D \$1 gold coins graded PCGS AU 58 for \$84,000 and \$96,000.

EXTREMELY RARE 1861-D \$1 GOLD LAMINATION MINT ERROR

This extremely rare 1861-D Dahlonega, Georgia gold coin, struck at the U.S. Branch Mint, is the only U.S. issue struck entirely under Confederate authority. The Dahlonega Mint closed in June of 1861. PCGS estimates a mintage of 1,000, and The Guide Book of United States Coins estimates a mintage of 1,250. It is rare in all grades. These were struck from a single die pair and were poorly produced. Many 1861 \$1 gold coins have mint error defects, splits, cracks and laminations.

This piece exhibits considerable luster, original surfaces and toning, and is a high-end almost uncirculated example. It is the second most valuable gold dollar in the series. Only the 1849-C Open Wreath variety is more valuable.

EXTREMELY RARE 1861-D \$1 GOLD LAMINATION MINT ERROR

Gold Errors are featured in my
NLG award winning book, *World's Greatest Mint Errors*.

The image shows page 31 of the book 'World's Greatest Mint Errors'. The page is titled 'Chapter 12 Gold Errors'. The main feature is a large, detailed image of a 1866 Liberty Quarter Eagle coin. The text on the page discusses the rarity and value of gold errors, mentioning that they are the most prized category of mint errors. It also describes the specific error of this coin, which was struck on a three-cent nickel planchet. Below the main image, there is another smaller image of a different gold coin, and some descriptive text at the bottom.

uspatterns.com

The Society of U.S. Pattern Collectors is dedicated to the study of many of the rarest coins struck at the U.S. Mint: patterns, die trials and experimental pieces.

Welcome to The Society of U.S. Pattern Collectors!

For those of you not familiar with this fascinating area of numismatics, patterns are prototypes for coins that, for the most part, were never approved for circulation. Most patterns are very rare, some unique, and others unknown outside of museums.

A good place to start learning about these pieces is our Beginner's Corner which includes a page on How to use this Website or the Photo Gallery which contains examples of many of the different pattern issues.

The United States Mint produced more than 1000 different patterns, as well as many die trials and experimental pieces. Despite the great rarity of many of these individual items, the great variety makes the series surprisingly collectable.

There are relatively few collectors specializing in United States pattern coinage. Most of these collectors target specific areas. For example, there are collectors who specialize in Indian Cent patterns, others collecting Morgan dollar patterns, and so on.

In addition to these specialists, there are thousands of collectors of regular issue United States coins who try to buy a few patterns to complement their collections. Many of these historical coins have wide appeal and are surprisingly affordable. There are many collectors who, for example, would like to own an 1855 Flying Eagle large cent (J-167, about 500 pieces struck) to go with their collection of large cents or with their collection of Flying Eagle small cents.

UK ONE POUND WRONG PLANCHET ERROR

by Jeff Ylitalo

This is a super nice wrong planchet error from United Kingdom. The obverse depicts a younger Queen Elizabeth III, third portrait. The reverse depicts a Celtic Cross from Northern Ireland.

A much thinner wrong planchet from another country was processed and subsequently struck at the British Royal Mint. This resulted in an error with design detail being absent on both faces of this error coin.

UK ONE POUND WRONG PLANCHET ERROR

The edge inscription shows appropriate edge lettering, but only at a half rate. The collar die reeding is present but weak.

The British Royal Mint has struck coins for select other countries and continues to do so to this day.

The weight is 4.8 Grams for this coin. Normal weight is 9.5 grams for this issue in 1996 Third Portrait of Her Majesty.

One Pound major errors during this period are super scarce. This One Pound error coin from 1996 is a one year type design.

PCGS CERTIFIES GERMAN GOLD OBVERSE DIE TRIAL STRIKES c.1612 MATTHIAS CORONATION MEDALS

by Mike Byers (mikebyers.com)

*Matthias II and Anna
German States - Frankfurt am Main
Listed & Illustrated in Forschner
PCGS MS65 and MS64
1 of Only 2 Known Sets*

PCGS CERTIFIES GERMAN GOLD OBVERSE DIE TRIAL STRIKES

This historical museum quality set of gold Coronation Die Trial Strikes was authenticated and certified by PCGS and is one of only two known sets. It is amazing that after 400 years, these gold Die Trials remained together, intact and preserved in gem mint state condition. They are both 5 Ducat size in diameter, 39 mm and 37 mm.

These die trials were struck on very thin gold planchets. Ron Guth is a consultant to Mint Error News, a former PCGS President, and founder of CoinFacts (now PCGS CoinFacts). Currently Ron serves as proprietor of GermanCoins.com and as Chief Investigator at the Numismatic Detective Agency, where he provides expert provenance on high-end coins. Upon reviewing these die trials, he stated that:

"I suspect that your die trials were made by striking a thin piece of gold laid on a softer material such as leather. This would account for some of the waviness in the planchets."

The British Museum has a similar and extremely rare Gold Coronation Medal that they describe as a cliche. Struck in 1658, in Austria/Hungary, this medal has a diameter of 42 mm and commemorates Leopold I as the Holy Roman Emperor. It is in magnificent condition and is a historical numismatic rarity on par with these Matthias II Gold Obverse Trial Strikes.

[Click here to view the British Museum Leopold I Gold Medal](#)

The Matthias II Obverse Trial Strike is listed and illustrated in Forschner as #34.1 gold, with a diameter of 39 mm and a weight of 2.49 grams. The other Die Trial of his wife Anna, is also listed and illustrated in Forschner as #34.3 gold, with a diameter of 37 mm and a weight of 2.31 grams. The Forschner numismatic reference book on medals is referenced by both PCGS and NGC for attribution and listing the Forschner # on the inserts.

Matthias II of Austria (Feb 24, 1557-March 20, 1619) was crowned King

of Hungary and Croatia in 1608. He was also King of Bohemia in 1611, as well as the Archduke of Austria. He was Head of the House of Habsburg.

Matthias II reigned from June 13, 1612 to March 20, 1619 as the Holy Roman Emperor. These gold obverse die trials commemorate his Coronation, and likely were presented to Matthias for his approval prior to striking the Coronation medals. No known medals were struck with this design. It's unbelievable that after centuries of war, barbaric times and world instability, these even exist today!

The Electors, located in Frankfurt am Main, Germany but part of the Roman Empire at that time, authorized and minted coins and medals to celebrate Coronations and the accession to the position of Holy Roman Emperor. Frankfurt am Main was a free City and only accountable to the Holy Roman Emperor. The Monarch who would receive the

Coronation at the hands of the Pope was elected by the Electors.

In 1618, during the last year of Matthias' reign as the Holy Roman Emperor, the Thirty Years War broke out in Europe, lasting until 1648. It was one of the most destructive wars in history, starting as a war between Protestants and Catholics but evolved into a major European full-scale war resulting in millions of deaths and transforming Europe. The Holy Roman Empire eventually became what is known as Austria and Hungary today.

In Freiberg, under Germany Frankfurt am Main, gold coins from 1612-1618 during the short reign of Matthias II (Freiberg #947-957) are designated as very rare and unpriced.

In The Standard Catalog of World Coins (Krause) the ND 1612 Matthias 3 Ducat (KM #43) is listed as rare and unpriced. The 5 Ducat (KM #44) is also listed as rare and unpriced.

PCGS CERTIFIES GERMAN GOLD OBVERSE DIE TRIAL STRIKES

Gold Coins of Matthias II are extremely rare in the larger denominations such as the 5 Ducat and 10 Ducat. Coronation Medals of Matthias II struck in gold are even rarer. Many of these are often damaged and heavily worn, selling in the \$20K to \$60K range in public auctions.

Stacks Bowers sold a German State Frankfurt am Main 5 Ducat ND 1612 commemorating the election of Matthias as the Holy Roman Emperor. It was 32.2 MM, 2 known, realizing \$60,000. in VF condition, with damage, graffiti in the obverse fields. In another Stacks Bowers auction, they sold an Austria Vienna 10 Ducat, 32.8 MM, of Matthias 1612 in EF condition, uncertified, realizing \$23,000 with damage, 2 carved X's in the obverse fields.

Recently in a Kunker German Coin Auction, a non damaged 10 Ducat 1619 of Matthias II from Vienna, Austria in good - very fine condition,

not certified by PCGS or NGC, sold for approximately \$164,650.

In an April 2024 Macho & Chlapovič auction, a Matthias II Gold Medal (20 Ducats) sold for \$321,371.

Very few gold medals of Coronations of European Kings, have the fascination and excitement of these 2 gold Obverse Die Trials. Additionally, in this case they also celebrate Matthias' rise to be the Holy Roman Emperor. They are historically significant and numismatically important since they document a Coronation and accession to the position of Holy Roman Emperor.

These PCGS certified Matthias Gold Obverse Die Trial strikes defy logic and history, both surviving 400 years in gem condition. They belong in the finest collection of European gold coins, in a world-class collection of numismatic treasures, or in a major Museum showcasing their history and significance.

In the March 2021 Heritage auction of The Paramount Collection, a Matthias II "Three Emperors" 5 Ducat from the Prague Mint, certified MS63 by NGC, for \$408,000.

Also in the same sale, a 10 Ducat 1612 of Matthias II from Vienna, Austria, certified MS62 by NGC, sold for \$204,000.

KENNEDY HALF DOLLAR ERROR COINS

by Christopher Talbot Frank, CTF Error Coins

Kennedy Half Dollar error coins are sought after by many error coin collectors for the large size of the coin and the big errors that can occur on them. Putting together a type set of the different types of errors that happen on Kennedys can be very challenging, but visually rewarding. Similar errors occur in all denominations, but they are generally bigger and bolder in half dollars. In the year 2002 to present, major Kennedy error coins became very scarce to non-

existent since the US Mint put in systems and processes to reduce mint error coins from being released. The two notable years of the Kennedy Half Dollar are of course the 1964 90% silver issue as well as the 1976 Bicentennial Half Dollar. If you like big bold error coins, search for major errors on Kennedy Half Dollars.

Swedish 1 Krona Struck on a 5 Markka Planchet From Finland

by Martin Wettmark

Here is a Swedish 1 Krona from 1997. By mistake it was struck on a 5 Markka planchet. I know of only one more off-metal error like this from 1998.

The Swedish Mint in Eskilstuna imported planchets from the Mint in Finland and among them were a few

5 Markka planchets which almost have the same diameter but are made in another alloy which made the coins look a bit more yellow.

The weight of the 5 Markka planchet is 6.7 grams instead of 7.0 grams for the 1 Krona coin.

Swedish 1 Krona Struck on a 5 Markka Planchet From Finland

Here are the normal 1 Krona and the normal 5 Markka from Finland:

Swedish 1 Krona Struck on a 5 Markka Planchet From Finland

Here is the off-metal error coin:

NGC CERTIFIES UNIQUE WARTIME DISCOVERY

2.5 GRAM BRONZE CENT

STRUCK AT THE SAN FRANCISCO MINT

by Mike Byers (mikebyers.com)

This is a fascinating 1942-S Lincoln Cent that was struck on a 2.5 gram bronze planchet with a composition of 95% copper, 4% zinc and 1% tin.

NGC CERTIFIES UNIQUE WARTIME DISCOVERY 2.5 GRAM BRONZE CENT STRUCK AT THE SAN FRANCISCO MINT

After examining this unique mint error and consulting with many experts on mint errors, patterns and die trials, the consensus is that it was struck on a 1942 Curacao cent planchet that had been coated or plated with zinc before being struck.

Planchets for the 1942 Curacao cent were produced by the U.S. Mint in Philadelphia and have the exact same specifications as this 1942-S cent; 2.5 grams in weight, a diameter of 19mm and a composition of 95% copper, 4% zinc and 1% tin. However, Curacao cents were never struck in San Francisco!

The Mint Error News website has a 69 page report of coins struck by the U.S. Mint for foreign countries.

It is the most comprehensive report available anywhere. Page 9 details the coins that were struck for Curacao including the 2.5 gram bronze cent planchet.

This unique new discovery has a partial zinc appearance on the obverse and reverse as well as a zinc band on the edge.

NGC CERTIFIES UNIQUE WARTIME DISCOVERY 2.5 GRAM BRONZE CENT STRUCK AT THE SAN FRANCISCO MINT

The U.S. Mint in Philadelphia experimented extensively with zinc and copper planchets during World War II. These experiments have been outlined in Roger Burdette's book *United States Pattern & Experimental Pieces of WW-II*. Test planchets in various compositions were produced, as well as many experimental surfaces such as plating and coating.

It is common procedure for pattern experts including NGC and Roger Burdette as well as the authors and researchers of the Judd reference book *United States Pattern Coins*, to classify coating and plating in their determination.

Dave Camire and NGC authenticated and certified the Philadelphia Collection which had many cents and planchets that were coated and

plated at the Philadelphia Mint. They also authenticated and certified many 1942 and 1943 Lincoln cents and planchets that were either coated or plated.

As amazing as it seems, it appears that this Curacao cent planchet was either coated or plated with zinc in the experiments during the transition of U.S. cents from bronze planchets to zinc-coated steel planchets.

If the planchet was intentionally plated or coated with zinc as part of the experiments then this would be classified as a test piece. If the planchet was accidentally mixed with U.S. cent planchets that were being experimented on, then it is a mint error. Subsequently, it somehow was transferred to the San Francisco Mint and struck by U.S. cent dies in 1942.

NGC CERTIFIES UNIQUE WARTIME DISCOVERY 2.5 GRAM BRONZE CENT STRUCK AT THE SAN FRANCISCO MINT

Here are examples of NGC certified coins and planchets from the U.S. Mint in Philadelphia during World War II that were plated and coated:

NGC CERTIFIES UNIQUE WARTIME DISCOVERY 2.5 GRAM BRONZE CENT STRUCK AT THE SAN FRANCISCO MINT

Although accidentally mixing planchets between U.S. Mint branches seems unlikely, it has occurred several times between the U.S. Mints in Denver and in San Francisco. There are 1974 Denver

silver Ike Dollars struck on planchets produced in San Francisco. And there are also 1977 Denver silver Kennedy Half Dollars struck on planchets produced in San Francisco.

This 1977 Eisenhower Dollar was struck at the Denver Mint. It was struck on a 40% Silver planchet that was only used to strike Eisenhower Dollars at the San Francisco Mint.

NGC CERTIFIES UNIQUE WARTIME DISCOVERY 2.5 GRAM BRONZE CENT STRUCK AT THE SAN FRANCISCO MINT

Although there is no absolute proof that this is exactly what occurred, nor is there any documentation, the most logical explanation to describe the chain of events of this unique 1942-S cent is intriguing and enigmatic. A Philadelphia Mint produced Curacao planchet was likely coated or plated when Philadelphia experimented with copper and zinc planchets and was subsequently struck in San Francisco by U.S. Cent dies.

For comparison and to provide similar information relative to 1942

U.S. Lincoln cents that were patterns, test pieces or mint errors, here are two excellent examples:

I recently handled the unique 1942 Philadelphia Mint Lincoln cent struck on an aluminum planchet in proof. Clearly it was a pattern and test piece experimenting with a different composition and alternative to producing copper cents in 1943, due to the copper shortage during World War II. This unique aluminum cent has traded several times, once at \$300,000.

1942 Lincoln Cent J-2079 Struck in Aluminum PCGS PR 66 UNIQUE

NGC CERTIFIES UNIQUE WARTIME DISCOVERY 2.5 GRAM BRONZE CENT STRUCK AT THE SAN FRANCISCO MINT

Another unique 1942 Lincoln cent experimental off-metal struck at the Philadelphia Mint was 95% tin and 5% zinc, realizing \$86,250 in a Stack's auction in 1996 (lot #4253).

In comparison, in 1996, copper 1943 Lincoln cents were \$30,000 - \$50,000. Today they are \$200,000 - \$350,000.

NGC CERTIFIES UNIQUE WARTIME DISCOVERY 2.5 GRAM BRONZE CENT STRUCK AT THE SAN FRANCISCO MINT

This unique 1942-S cent, most likely struck on a 1942 Curacao cent planchet from the Philadelphia Mint, coated or plated with zinc and then struck in San Francisco by U.S.

cent dies, will remain an enigmatic discovery. It belongs in a world-class collection of Lincoln cents, major mint errors or unique numismatic rarities.

PCGS CoinFacts

Your Online Reference for U.S. Coins

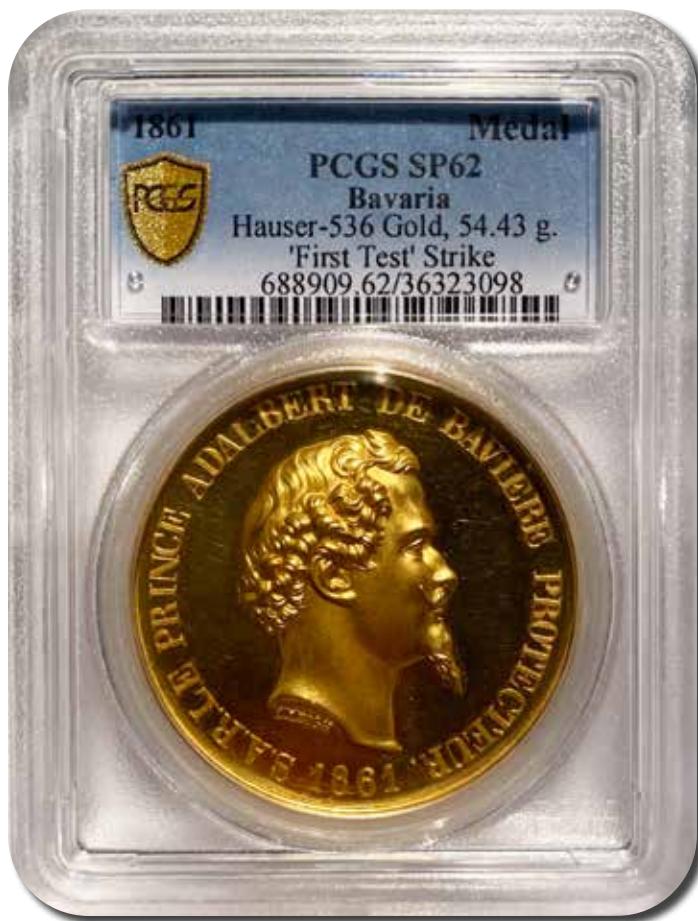

PCGS CoinFacts includes comprehensive information on nearly 30,000 U.S. coins. It offers everything from basic, startup information for new collectors, to a wealth of detailed information the seasoned collector, buyer or seller can't afford to be without.

From the PCGS CoinFacts Home Page, you can access all denominations and major types of U.S. coins. The link will take you to a Series Page, which offers images of the finest PCGS-graded coin in the series, and a nice explanation including the history and why the coins in the series are important.

The real “business end” of PCGS CoinFacts begins with the individual coin pages, which are loaded with photos and information. To view the essential features of PCGS CoinFacts, you can click on them one at a time, or go straight to a particular feature of interest.

UNIQUE BAVARIAN MEDAL GOLD OFF-METAL STRIKE WITH MINT ENGRAVING “FIRST TEST” (TRIAL STRIKE)

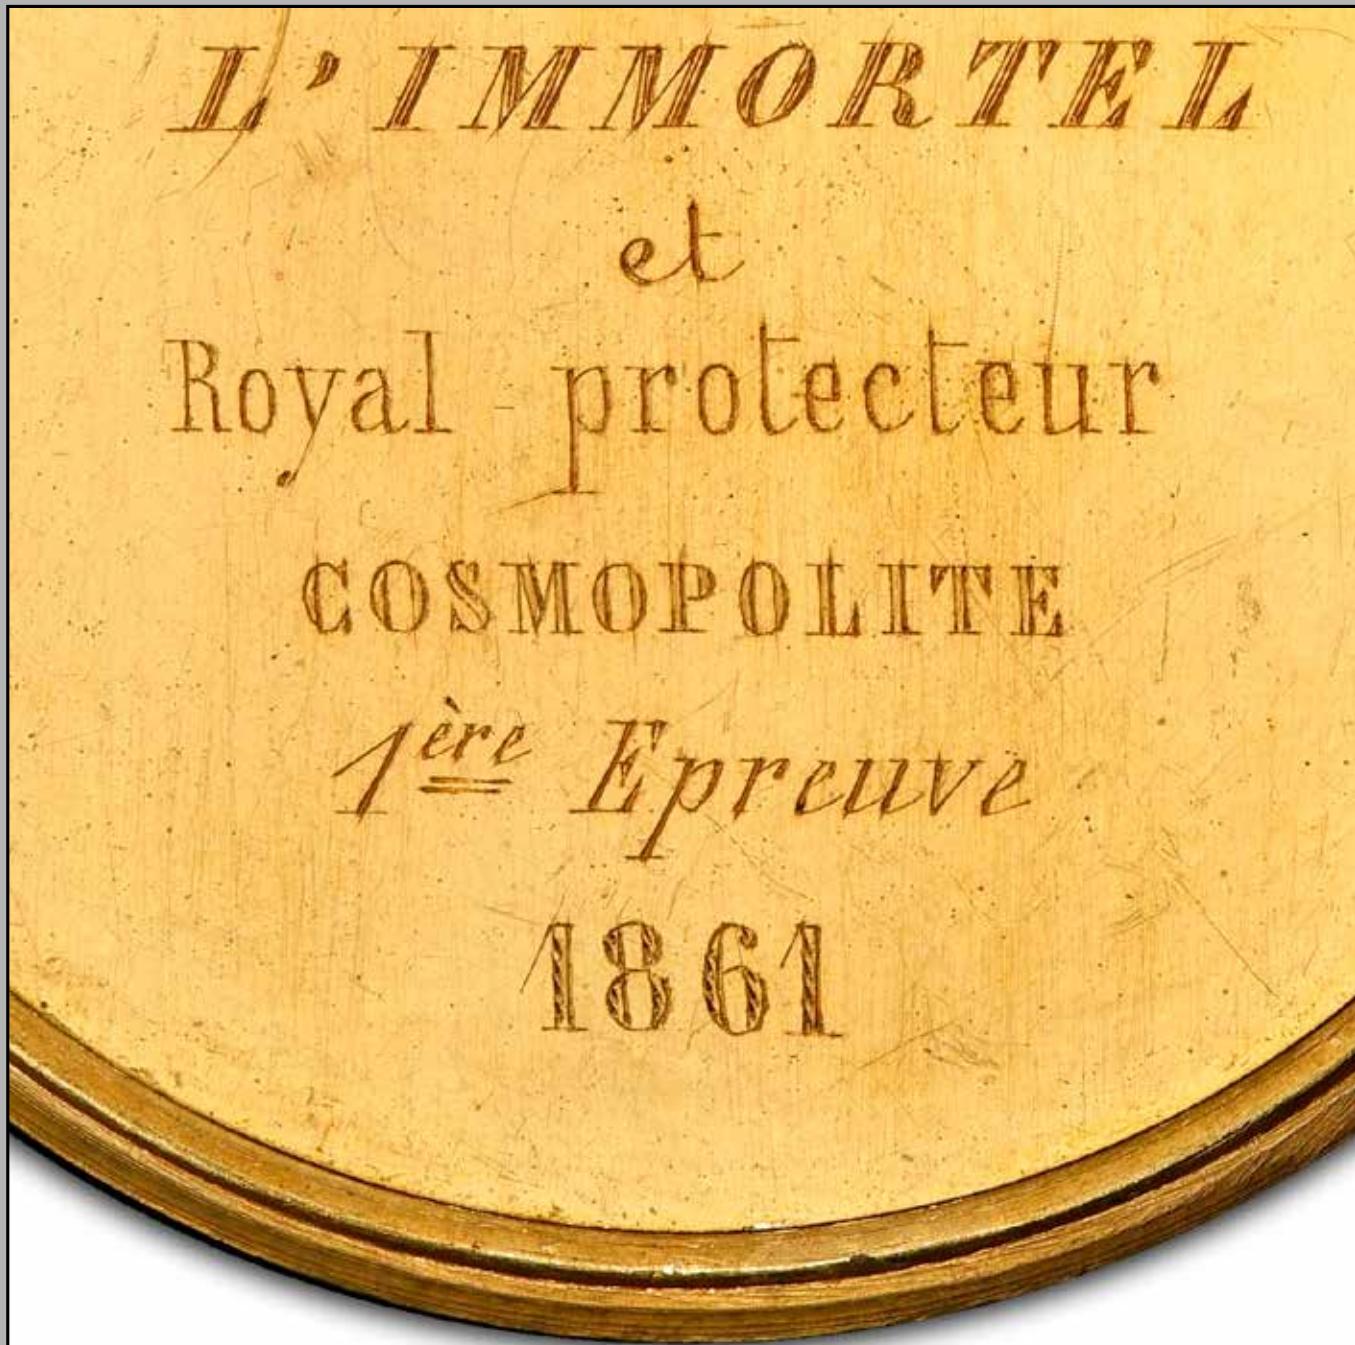

by Mike Byers (mikebyers.com)

UNIQUE BAVARIAN MEDAL GOLD OFF-METAL STRIKE WITH MINT ENGRAVING

The reverse includes six lines of hand engraving from the Bavarian Mint:

L'IMMORTEL / et / Royal protecteur / COSMOPOLITE / 1ère Epreuve / 1861

1ère Epreuve translates to “First Test”

UNIQUE BAVARIAN MEDAL GOLD OFF-METAL STRIKE WITH MINT ENGRAVING

This is a unique and spectacular German Bavaria Gold Medal struck as a specimen in high relief. It is a “First Test” (trial strike) with six lines of hand engraving from the Bavarian Mint. Inscribed on the reverse is “1ère Epreuve” which translates to “First Test.” It was presented to the House of Wittelsbach for approval.

It is unlisted in gold and is a unique special presentation gold off-metal strike. The Hauser reference book only lists this medal (#536) in tin and bronze. It weighs 54.43 grams with a diameter of 42.59 mm. Designed by L. Leigh, it portrays Prince Adalbert, who was the brother of King Maximilian II, in dramatic high relief format. It has a special inscription on the edge:

TRES RESPECTUEUX
HOMMAGE DU FONDATEUR,
LE CONSEILLER DUTRÔNE
RECONNAISSANT Ü.

The level of preparation and detail in producing this 150 year old specimen gold medal is amazing. It was struck several times creating a high relief cameo portrait with proof-like mirror surfaces. It was struck in 1861 at the Bavarian Mint which is one of the oldest mints in the world, having existed for over 850 years.

For nearly 800 years, the House of Wittelsbach ranked as one of the most powerful and influential of all European dynasties. The Wittelsbachs served as Electors Palatine, Electors of Bavaria, and Counts Palatine. Members of this remarkable family

UNIQUE BAVARIAN MEDAL GOLD OFF-METAL STRIKE WITH MINT ENGRAVING

reigned not only in Bavaria, but also in many foreign lands and territories. Many members of the House of Wittelsbach were dukes, kings, and Holy Roman emperors including each of the Bavarian kingdom's six monarchs (Maximilian I Josph, Ludwig I, Maximilian II, Ludwig II, Otto, and Ludwig III).

On March 20, 1848 King Ludwig of Bavaria abdicates. The Crown Prince becomes Maximilian II, King of Bavaria. He died on March 10, 1864. In 1861, King Maximilian II honored his brother, Prince Adalbert Wilhelm Georg Ludwig by producing a specimen gold medal with his portrait, commemorating hornless cattle breeding.

Gold coins and medals that were hand engraved at an official government mint as test pieces or trial strikes are extremely

rare. Another hand engraved gold coin that comes to mind was produced by James Longacre for the test strike for the 1849 \$1 gold pattern, Judd #115. It is the only known U.S. pattern that was hand engraved. It sold for \$76,375 in a Heritage auction in April 2015.

This gold medal combines rarity (unique), history (struck at the Bavarian Mint in 1861 as a "First Test" trial strike), mystique (only one of several gold coins, patterns or medals that were officially struck and hand engraved at a government mint), pedigree (the House of Wittelsbach).

This historic and beautiful high relief specimen gold medal belongs in a museum, a collection of patterns and test strikes or a collection of German gold coins, medals and numismatic rarities.

Prince Adalbert Wilhelm Georg Ludwig:

COINWeek

The CoinWeek Mission:

Our mission is a simple one, to inform, entertain and educate our readers about coins, paper money, and every other area of numismatic pursuit.

We accomplish that mission by having the best numismatic writers and contributors in the industry. In fact since 2011, CoinWeek writers and contributors have won over 40 Numismatic Literary Guild Awards and CoinWeek itself has been named the “Best Online News Site” for the last 4 years straight.

CoinWeek provides the facts that collectors can use. We tell the back stories about coins and the people that collect and sell them. We provide perspective commentary and analysis on the issues that effect the industry and the hobby we love.... **And we do it all for FREE.**

Why You Should Read CoinWeek:

- CoinWeek is independent and unafraid of tackling important issues that face the hobby.
- CoinWeek and its representatives attend almost all of the major Coin & Currency conventions in order to bring the most current print and video news from the numismatic marketplace to our readers.
- CoinWeek offers innovative coverage of modern coin issues, auction houses, and the world mints. We go beyond the surface information you usually find elsewhere.
- CoinWeek maintains the largest numismatic video library accessible on the web to offer our subscribers the most comprehensive educational video available with information about rare coin and currency news, seminars, interviews, collecting tips and more.

Swedish Mint Errors In Iron

by Martin Wettmark

As I have mentioned before, some low denominations of Swedish coins were struck in iron during the first and second World War.

Here are 4 quite unusual error coins in iron.

The first one is a 5 Ore from 1918 with a full brockage strike. As You see it is in a high quality. I only knew of one more 5 Ore full brockage coin from Gustav V (he was King between 1909-1950). Strangely it is from the same year 1918.

Swedish Mint Errors In Iron

The second error is a 1 krona from 1943 which was struck on a 2 ore planchet. Very rare.

The third is a 2 ore from 1950 with an indent from a 1 ore planchet also with the struck coin separate.

Swedish Mint Errors In Iron

The last error is a 5 ore coin from 1947 with a partial indent and multiple strikes.

Mint Error News Price Guide

- Updated February 2026 -

This price guide is brought to you by Mint Error News. It has been compiled by many of the top major mint error dealers.

This price guide is a guide. Prices fluctuate due to the date, grade, eye appeal and how dramatic the striking error is. Rarity is also a factor. The price is sometimes based on the rarity and grade of the type of coin as well as how rare the error is. The price can also vary depending on whether two collectors are bidding for the same rare major mint error. When purchasing a mint error, it is important to use multiple resources to determine value, as there are many mint errors that do not fit into one category.

Proof Errors (Updated February 2026)

Proof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined, and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes in collars and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

A very small group of Proof errors recently came from a collection that was auctioned by the State of California. The U.S. Secret Service inspected and released this collection to the State of California determining that it was legal to own. The State of California then auctioned the collection and it has been dispersed since the sale.

Denomination	Broadstrikes	Die Trials	Double/Triple Strikes	Off-Center Strikes	Partial Collar Errors

Broadstrikes (Updated February 2026)

A broadstruck error occurs when a coin is struck without the collar to form the rim and edge that is part of the shape of the coin. Coins can be broadstruck on either type one or type two planchets. When a coin is broadstruck the blank being fed into the collar will spread and distort outward as it is being struck because the collar isn't in the correct position to retain it.

Partial Collars (Updated February 2026)

Partial collar strikes occur when there is a malfunction of the striking press. This causes the collar to be in an incorrect position. The lower die (usually the reverse die) is recessed in the collar. This allows the coin which is going to be struck to have a formed rim. After a coin is struck the lower die raises upwards, pushing the struck coin out of the collar and ejecting it. If a blank entering the collar is not properly seated, it will only have partial reeding as it is struck. The edge of this coin will have a partial reeding and a partial blank surface area. Recently, the Mint has installed new machinery where either die can be installed in either position.

Uniface Strikes (Updated February 2026)

Uniface coins occur when there have been two blank planchets in the press at the same time. The other blank will obstruct the die on either the obverse or reverse side, which will prevent it from having that design on the coin. There are many different variations involving uniface errors. In addition to having a 100% blank obverse or reverse, a coin can be struck off-center, with a blank planchet in the collar which will obstruct one side of the off-center. There are also mated pairs which have a combination of multiple errors which can include a side which is uniface. Finally, there are uniface strikes due to a die cap which adhered to the die, forming itself in the shape of a die and striking blank planchets.

Denomination	Uniface Obverse XF	Uniface Obverse Unc	Uniface Reverse XF	Uniface Reverse Unc

Bonded Coins (Updated February 2026)

Bonded coins occur when the feeder system, which supplies blank planchets to the coin press, malfunctions and jams. When this occurs, a struck coin is not properly ejected and another planchet is fed into the collar and is struck. This struck coin will land on top of the previously unejected strike. These coins will then crush and bond together. This may occur many times as more coins bond.

Denomination	2 Planchets	3-4 Planchets	5-10 Planchets

Struck Fragments (Updated February 2026)

The blanking press takes the coils of metal strips and punches blanks out of it, ejecting the webbing at the other end. The webbing is cut into small scrap pieces to be melted and recycled. Occasionally a scrap piece will be mixed with the blank planchets and struck by the dies. Struck fragments are rare in the larger denominations. These can be uniface or die struck both sides and are very rare on type coins.

Denomination	Uniface	Die Struck Both Sides
Indian Cent	\$1,000	\$2,000
Lincoln Cent Wheat Ears	\$750	\$2,000

Mated Pairs (Updated February 2026)

Mated pairs involve two individual coins with different errors that were struck together at the same time. Mated pair error combinations can be found in most error types and come in many shapes and sizes. Mated pairs can be overlapped when one of the coins is struck off-center on top of another coin. Another type involves a brockage where a struck coin was perfectly centered on a blank and restruck. Some mated pairs involve a die cap where the cap and brockage coin are discovered together, but this is a scarce find.

The rarest mated pair type involves two die caps (obverse and reverse) where both dies were capped at the same time and both die caps are mated. This last type is extremely rare and there are only a few known examples of mated pairs involving an obverse die cap and reverse die cap. There are several of these mated pairs known on Kennedy Halves including two dated 1976, which is the Bicentennial year. One of the most spectacular mated pairs involve two Barber Dimes, an obverse die cap mated to a reverse die cap and are unique.

Mated pairs can also involve an off-metal where a smaller blank planchet or smaller struck coin was struck on top of a larger coin. This type is extremely rare. The most spectacular pair known is a double struck Franklin Half which was mated to a Lincoln Cent. The Lincoln Cent blank was on top of the obverse of the struck Franklin Half. This pair was then struck together. It is unique.

Denomination	Overlapping	Full Brockage	Die Cap	2 Die Caps

Mint Error News Price Guide

Transitional Errors (Updated February 2026)

A transitional error occurs when a coin is struck on a planchet from a previous year with different metal composition. The most famous transitional is a 1943 copper cent struck on a 1942 copper blank. 1943 cents were struck in steel because of the copper shortage during World War II. Other famous transitionals include 1965 coinage struck in silver instead of clad.

There are also transitionals struck on blanks for the next year. An example is 1964 coinage in clad instead of silver. Most recently, transitionals were discovered involving the SBA and Sacagawea Dollars of 1999 and 2000. There are eight known 1999 SBA Dollars struck on the brass planchet for the 2000 Sacagawea Dollar, and four known 2000 Sacagawea Dollars struck on a clad planchet for the 1999 SBA Dollar.

Denomination	Off-Metal Planchet	Circulated	AU	Unc	Choice Unc – Gem
Lincoln Cent 1943 Transitional	Copper Cent Planchet	\$200,000	\$250,000	\$300,000	\$350,000

U.S. Gold Errors (Updated February 2026)

Major mint errors on U.S. Gold coins are the most prized category of all mint errors. Gold errors are very rare and a few have traded in the \$75,000 to \$100,000 range. Even a broadstruck U.S. Gold coin can easily sell for \$15,000 to \$30,000 compared to a broadstruck Cent, Nickel, Dime or Quarter which all sell for well under \$10. Many serious collectors of Gold Errors have to wait patiently for months and sometimes even years to acquire that one special piece for their collection.

The prices listed here are for common dates in AU-Unc. Better dates and errors that are in gem condition are worth considerably more.

Denomination	Partial Collar	Broadstruck	Clipped Planchet	3% - 5% Off-Center	10% - 15% Off-Center
\$1 Gold Type 1	\$2,000	\$5,000	\$2,000	\$3,000	\$7,500

Indents (Updated February 2026)

An indent error occurs when two blanks are fed inadvertently into the same collar, with one blank partly overlaying on top of the other. When the hammer die strikes this combination, the upper blank will be forced into the lower blank, creating a depression which is shaped similar to the upper blank. A scarce type of indent occurs when a blank intended for one denomination lands on top of a blank from a different denomination.

Die Caps (Updated February 2026)

Die caps are caused when a struck coin sticks to the upper hammer die. Once the coin is struck to the die face, the reverse of the struck coin becomes the new die face. When the next blank is fed into the collar and the strike occurs, the reverse design of the adhered struck coin impresses itself into the new blank. This struck coin is a brockage strike. The coin that adhered to the upper die is known as a die cap. This process repeats itself as more coins are struck by the cap. The greater the number of strikes, the higher the cap metal will be pushed around the upper die shaft. Eventually, the cap breaks away from the die in the shape of a thimble.

Die Adjustment Strikes (Updated February 2026)

Die adjustment strikes are also known as die trials. This error occurs when a coin is struck from the press with very little pressure. When the press is being set up and adjusted, extremely weak strikes occur as the strike pressure reaches its optimum level. These die trials are destroyed after being struck and are rarely found in circulation.

Double Denominations (Updated February 2026)

One of the most expensive, popular, and desired types of errors are the double denominations. This error happens when a coin is struck on a previously struck coin of a smaller denomination. Examples are a cent on a struck dime, and a nickel on a struck cent. The most dramatic are those with considerable design visible from the original strike. There are a few known double denominations with different dates.

Brockages (Updated February 2026)

A bimetallic bimoid error can only occur when there are two coins involved. One of the coins involved will always be a struck coin which has not ejected properly. That struck coin will find its way back between the dies and will be struck next to a blank planchet which was fed into the collar. The image of that first struck coin will be impressed into that side of the blank planchet. The result will be a second coin which has images of the first coin impressed into it. Those images will be pressed into the coin and the image will be in reverse. This incuse sunken image is known as a bimetallic bimoid error.

Double & Multiple Strikes (Updated February 2026)

When a blank planchet is struck by the dies, the normal procedure is for the feeders to eject the struck coin out of the collar and into a chute. If there is a malfunction and the struck coin isn't ejected, it may receive a second or third strike by the dies. A multiple struck coin can happen in many ways and have many combinations of errors.

(Since each double and multiple strike can vary from being 10% off-center to 90% off-center, the prices listed below can be substantially more based on the percent off-center and dramatic overall look.)

Off-Center Strikes (Updated February 2026)

Off-center coins are one of the most common and best known types of errors. This happens when a blank which is supposed to be fed into the press, lands in the collar improperly. When this occurs only part of the blank is between the upper and lower dies. When the dies strike the blank, only that part will be struck with a design.

Off-Metals (Updated February 2026)

Off-metal and wrong planchet errors occur when a correctly made blank from one denomination is accidentally fed into a press for another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin of a different metal.

Mint Error News Price Guide

Counterbrockages (Updated February 2026)

A counterbrockage error involves a cap die and a previously struck coin. When a cap die strikes a previously struck coin, the obverse design from that struck coin will be impressed into the cap. The result will be a design where the cap face will be an incuse brockage. When a new blank is struck by this cap die with an incuse brockage image, the obverse will have a raised and spread image from that incuse design of the cap. This brockage impression is known as a counterbrockage.

Fold-Over Strikes (Updated February 2026)

A fold-over coin is one of the most dramatic types of errors. It occurs when the blank is standing vertically between the dies. During the strike, the force is so great that it bends and folds the blank. These fold-overs can be on-center or off-center, and come in many different shapes. There are a few fold-overs with multiple errors, either with an additional strike or fold-over. Denominations above quarters are very scarce.

Denomination	AU	AU Dated	Unc	Unc Dated

Martha Washington Test Pieces (Updated February 2026)

There is one set of a Dime, Quarter and Half struck by Martha Washington dies that are permanently housed in the Smithsonian Institute, embedded in blocks of lucite. According to United States Pattern and Related Issues, by Andrew W. Pollock III, “the only trial pieces purported to have survived metallurgical testing in 1965 were the Dime, Quarter Dollar, and Half Dollar equivalent strikes in copper-nickel clad over copper.”

Mike Byers' discovery of the Martha Washington Test Piece on a copper-zinc Cent planchet struck 10% off-center with a uniface reverse was a front page Coin World article on August 7th, 2000.

Denomination	Unc	Choice	Gem
Martha Cent	\$1,000	\$1,500	\$2,000
Martha Nickel	\$4,500	\$6,000	\$7,500
Martha Dime	\$7,500	\$10,000	\$12,500
Martha Quarter	\$1,000	\$1,500	\$3,000
Martha Half Dollar	\$5,000	\$7,500	\$10,000
Martha Dollar (SBA Planchet)	\$5,000	\$7,500	\$10,000
Martha Dollar (Sac Planchet)	\$1,000	\$1,500	\$2,000

MINT *ERROR* NEWS MAGAZINE

Issues of Mint Error News Magazine are available for you to read online at:

minterrornews.com

Mike Byers is the Publisher & Editor of Mint Error News Magazine

Private Mint News

Private mints and their issues have a long and illustrious history, but it is often hard to assemble, often years later without good documentation. When working with sovereign mints like the United States Mint, there is often a lot of archives and records available to research which is not available for private mints.

To address this, Private Mint News is a new online publication focusing on numismatics from by private mints. Private mint issues or creations, often in the form of tokens and medals called exonumia, is a rich and evolving area, however, research information can be thin on both classic and recent issues, especially the latter. The goal of Private Mint News is to assist in rectifying this situation by documenting and discussing issues from Private Mints of all eras.

Coverage includes private mints issuers of all eras and locations with an initial focus on the United States. Modern issuer coverage will include Daniel Carr of Moonlight Mint, Ron Lands of Gallery Mint Museum, Jared Grove of Grove Minting, Provident Metals, and other issuers. Classic issuers will include issuers of tokens, medals and coins including Civil War Tokens, So-Called Dollars, Territorial and Pioneer coins as well as Private Patterns.

RON GUTH, C.P.A.

German coin specialist

Ron Guth, Numismatic Expert

Ron Guth is a recognized authority on United States and German coins. He is a licensed Certified Public Accountant who has been involved professionally in numismatics for over fifty years as a collector, dealer, researcher, and writer. His books and articles have earned numerous awards, including the American Numismatic Association's Heath Literary award and the Olga & Wayte Raymond awards, the Numismatic Literary Guild's Best Numismatic Investment Book and Best Book of the Year awards, and the Professional Numismatic Guild's Best Book of the Year award. In 2003, Ron received the prestigious President's Award from the American Numismatic Association in recognition of his numerous contributions to numismatics. In 2021, Coin World named Ron as one of the Top Ten Most Influential People in Numismatics for the sixty-year period from 1960-2020.

Ron created the CoinFacts website (now PCGS CoinFacts) in 1999 and sold the website to Collectors Universe in 2004 (where it is now presented as PCGS CoinFacts). Ron served in various capacities at Collectors Universe, including Director of Numismatic Research, President of the Professional Coin Grading Service, and President of PCGS CoinFacts.

Currently, Ron serves as proprietor of GermanCoins.com and as Chief Investigator at the Numismatic Detective Agency, where he provides expert provenance on high-end coins.

MIKE BYERS INC

MIKEBYERS.COM

U.S. & WORLD MAJOR MINT ERRORS

Consign Your Coins to mikebyers.com

Terms and Conditions

We are offering this service for error collectors and dealers alike. In order to post your item on our website you must agree to the following terms and conditions.

1. All coins must be certified by PCGS or NGC and have a minimum value of \$5,000 each. All U.S. Mint Errors must be dated prior to 2002.
2. Each item must meet our inventory criteria in terms of desirability and market value.
3. Mike Byers Inc charges a 10% Commission on each sale.
4. The minimum time for any listing is thirty days.
5. Seller agrees to a seven day return privilege from date of receipt.
6. Seller agrees to use an escrow service if requested by the buyer.
7. We reserve the right to deny or cancel any listing at any time.
8. All listing are subject to prior sale.

Scanning Specifications

1. Scan both the obverse and reverse of the entire holder.
2. Scan with a resolution of at least 300 dpi.
3. Save the picture in jpeg format (jpg).

Information Requirements

In addition to e-mailing a photo of your item, please include the following information:

1. Name, Address & Phone Number
2. E-Mail Address
3. Asking Price

After your item is listed, we will contact you by e-mail with any offers and questions. Once a price is agreed upon we will handle the entire sale for a 10% transaction fee, which includes all costs (eBay fees, grading fees, webmaster charges, postage and registration fees, insurance, paperwork, etc.).

If you have a collection for sale or would like to sell your duplicates and do not want to consign your coin(s), we can purchase your entire collection outright. Please contact us at mike@mikebyers.com.

CONECA

The Combined Organization
of Numismatic Error Collectors of America

CONECA is an international numismatic organization devoted to the education of error and variety coin collectors. CONECA focuses on many error and variety specialties, including doubled dies, repunched mintmarks, multiple errors, clips, double strikes, off-metals and off-centers -- just to name a few. It publishes an educational journal, The ErrorScope, which is printed and mailed to members bimonthly. CONECA offers a lending library, examination, listing and attribution services; it holds annual meetings at major conventions (referred to as Errorama) around the country. Please visit conecaonline.org and enjoy!

CONECA Variety Attribution Services

CONECA offers attribution services. The service enables members and non-members to send their coins directly to an authorized CONECA attributer.

CONECA Error Examination Services

CONECA offers examination services. The service enables members and non-members to send coins to an authorized CONECA examiner who will return an opinion of each coin's error classification.

MINSHULL TRADING

The Principal Owner Lee Minshull has been in the business for over 40 years. Other Partners Brian Hodge (President of Numismatics, PNG) and Balazs Csaki (Chief Financial Officer) have added tremendous value to this legacy. Over the last three decades we have been a leader in the numismatic industry and have grown into a formidable market maker, garnering the respect of every major market player.

We establish and support markets that our customers can rely on, from “Top 100 U.S. Coins” to the most recent U.S. Mint modern releases. We take pride in our unmatched customer service and are recognized industry-wide for our immediate payment.

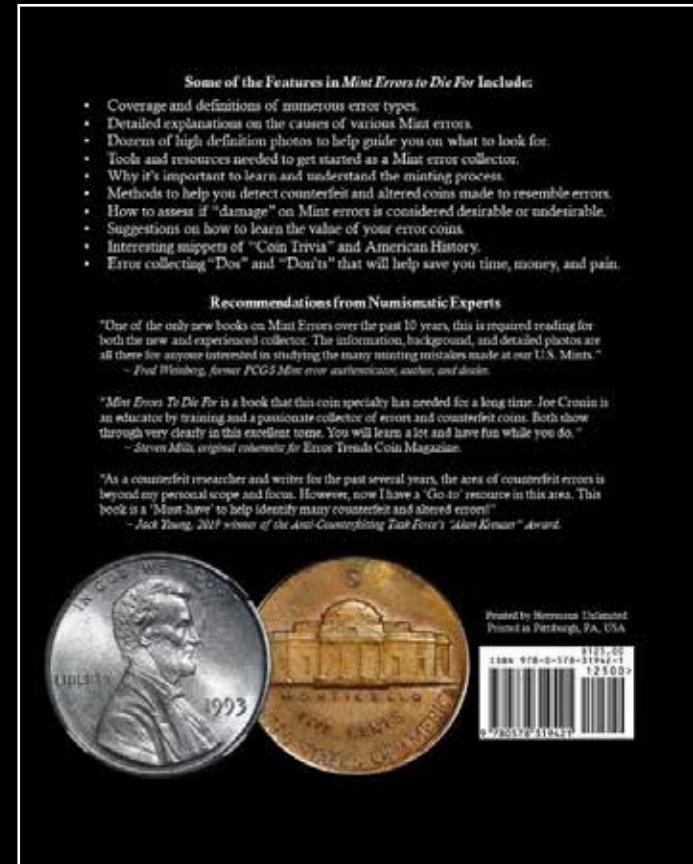

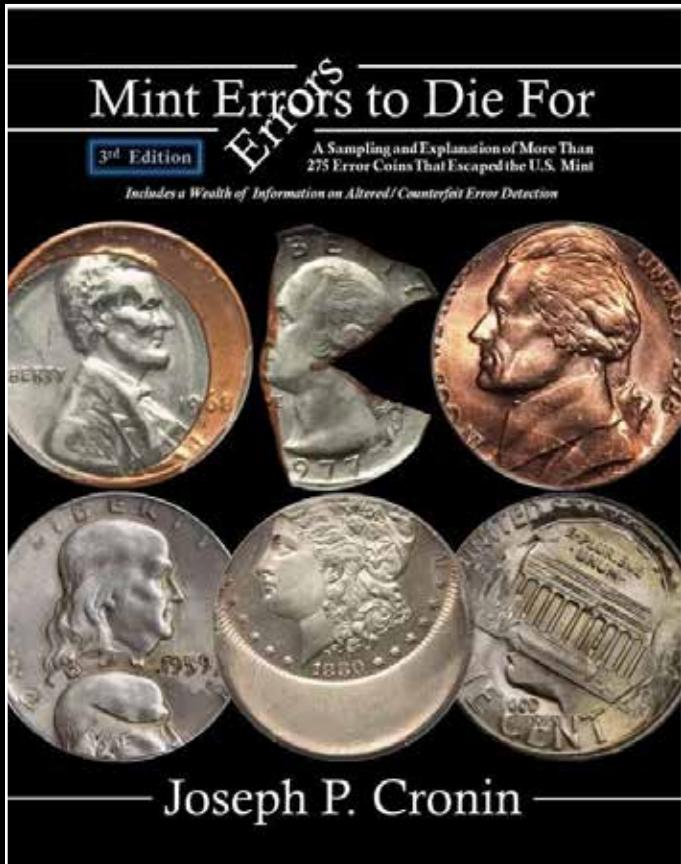

We are members of every major numismatic organization in the country, including PNG, ICTA, FUN, CSNS, and life members of the ANA. We are a regular Red Book contributor and maintain consistent and up-to-date pricing to sustain healthy markets.

Minshull Trading boasts over \$2.5bn in sales to date and has over 100 years of combined numismatic experience that our customers have come to rely on as a trusted source. We earn repeat business because we do what we say, every time. Give us a call today and find out what sets us apart.

An Exciting New Mint Error Book:

Mint Errors to Die For

A Sampling and Explanation of More Than 250 Error Coins That Escaped the U.S. Mint

Some of the Features in *Mint Errors to Die For* Include:

- Coverage and definitions of numerous error types.
- Detailed explanations on the causes of various Mint errors.
- Dozens of high definition photos to help guide you on what to look for.
- Tools and resources needed to get started as a Mint error collector.
- Why it's important to learn and understand the minting process.
- Methods to help you detect counterfeit and altered coins made to resemble errors.
- How to assess if "damage" on Mint errors is considered desirable or undesirable.
- Suggestions on how to learn the value of your error coins.
- Interesting snippets of "Coin Trivia" and American History.
- Error collecting "Dos" and "Don'ts" that will help save you time, money, and pain.

Recommendations from Numismatic Experts

"One of the only new books on Mint Errors over the past 10 years, this is required reading for both the new and experienced collector. The information, background, and detailed photos are all there for anyone interested in studying the many minting mistakes made at our U.S. Mints." — *Ed Weisberg, former PCGS Mint error authenticator, author, and dealer.*

"*Mint Errors To Die For* is a book that this coin specialty has needed for a long time. Joe Cronin is an educator by training and a passionate collector of errors and counterfeit coins. Both show through very clearly in this excellent tome. You will learn a lot and have fun while you do." — *Steve Mills, original columnist for Error Trends Coin Magazine.*

"As a counterfeit researcher and writer for the past several years, the area of counterfeit errors is beyond my personal scope and focus. However, now I have a 'Go-to' resource in this area. This book is a 'Must-Have' to help identify many counterfeit and altered errors!" — *Jack Young, 2017 winner of the Anti-Counterfeiting Task Force's "Alan Kresser" Award.*

Mint Errors to Die For

A Sampling and Explanation of More Than 250 Error Coins That Escaped the U.S. Mint

Non-gold Coins Struck on Gold Planchets

1913 photos PCGS® used by permission at PCGS.com/
CoinFacts; NGC label photo courtesy of MikeByers.com

Coin Trivia: Though the 1913 Buffalo nickel is on a \$5 gold Half Eagle planchet, Mint errors on \$2.5 gold planchets include: Indian Head Cents: (3) 1900, 1905, 1906, and 1907. Lincoln Cents: 1911, 1915, and 1927

1913 (Type 2) Buffalo Nickel: Struck on a \$5 Gold Half Eagle Planchet

Though there are nine known cents (six Indian Heads and three Lincolns) struck on gold Quarter Eagle (\$2.5) planchets, this is the only known Buffalo nickel struck on a gold planchet of any type; in this case, it's likely a \$5 gold Half Eagle planchet. (Some speculate it was made intentionally as were the five known 1913 Liberty nickels). Sadly someone cut into the rim on the reverse at 8 o'clock (see photo below) likely to prove it's just another plated novelty coin. Now even if you're 99.9% sure your suspect coin is a fake, don't ever, ever do that! As a result, PCGS gave it a "Genuine/AU Details" grade. It's no surprise that the psychological impact of PCGS' grade adversely affected its initial selling price: \$78,000 at Heritage Auctions in January of 2021 – a heck of a lot less than what many experts expected despite the damage.

In an interesting twist, Las Vegas rare coin dealer Mike Byers reacquired the coin and advocated it shouldn't have been given a "Genuine" label as there are a few other high-profile straight-graded coins/patterns with post-Mint alterations. NGC agreed and straight-graded it at AU-53; he later sold the coin privately for \$400,000! (Source: MikeByers.com/6324417-001.html)

What the Planchet Was Intended to Become

Below is a 1913 Indian Head \$5 gold Half Eagle, which is likely what the planchet for the featured 1913 Buffalo nickel was supposed to become. Seeing that U.S. Mint control of gold and silver planchets was so tight even back then, it is unknown if this is a true error or a Mint-assisted coin. (Photos courtesy of PCGS® Used by permission at PCGS.com/CoinFacts)

Numismatic Literary Guild 2013 Best US Coin Book!

**UNITED STATES
PATTERN &
EXPERIMENTAL
PIECES OF WW-II**

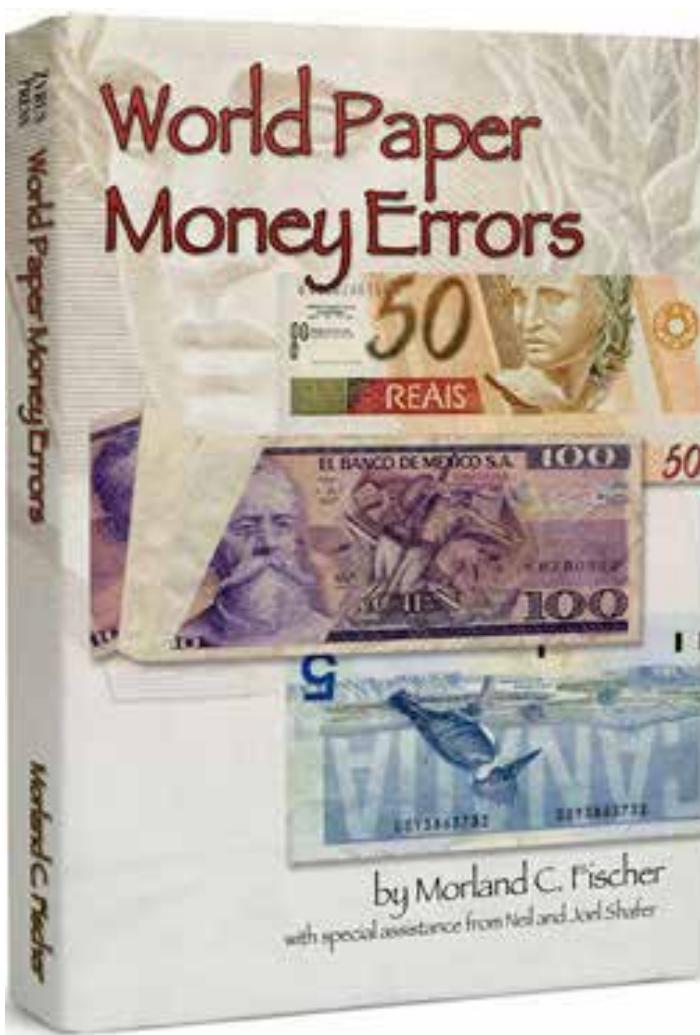

Roger W. Burdette

United States Pattern and Experimental Pieces of WW II uncovers the range and complexity of Mint experiments during this critical period in our history. Every documented experimental and pattern piece is described, illustrated where possible, and explained in detail. Author Roger W. Burdette untangles the mass of myth and assumption about these enigmatic pieces, and presents never before published research into the 'How' and 'Why' of their creation.

WORLD PAPER MONEY ERRORS

World Paper Money Errors Explored!

Odd shapes, upside down prints, intriguing cuts and folds, and missing design elements are only a few of the different printing errors examined in this expansive collection on foreign error notes. *World Paper Money Errors* is a visually compelling avenue into the fascinating and rarely explored area of numismatics that expands on the hobby of collecting paper currency.

Author Morland Fischer's comprehensive collection reflects the attraction and advantages of exploring foreign printing errors. An overview of collecting paper money errors in today's numismatic market offers insights on the great disparity between domestic and world notes. Market values are discussed, acknowledging what variables make an error note precious in the trade. Incorporating these concepts and more, Fischer expands the method of collecting currency errors by introducing a Foreign Error Note (FEN) scale to gauge price levels based on error type.

With over 200 examples of dramatic, colorful and intriguing foreign paper money errors, collectors and spectators alike are exposed to a new form of collecting currency. The numismatic community will benefit from this thorough guide that is unlike any other on the market.

New Edition of Bart's United States Paper Money Errors Available Now

UNITED STATES PAPER MONEY ERRORS

A Comprehensive Catalog & Price Guide

Comprehensive Catalog and Price Guide makes first appearance since 2008

By Coin & Currency Institute....

After a lapse of seven years, a new edition of United States Paper Money Errors, Fred Bart's ground-breaking book is now available. The fourth edition is more than just an update to the third: Bureau of Engraving and Printing (BEP) errors have been added, nearly all the illustrations have been changed, there is a rarity guide for each note—which additionally are now priced in four grades (EF, AU, Choice CU and Gem CU)—and, for the first time, there is a section showing some notes in color.

This has always been an enormously popular book, not only among established collectors but also with newcomers seeking to learn more about their “find.” There is no other book like it on the market. More than a price guide, its 296 pages contain a wealth of information on what to look for and what mistakes to avoid. It is a necessity for all dealers, collectors, and anyone who comes into regular contact with paper money.

- The new and improved must-have book for U.S. paper money errors
- Rarity guide for each note
- Prices in four conditions
- The universally-used Friedberg Numbering System™—The standard method for describing U.S. currency
- Invaluable appendices with data found nowhere else
- Hundreds of photos
- 296 pages, 20+ with new info
- Convenient & handy 5.75 x inch format

New From Penguin Random House:

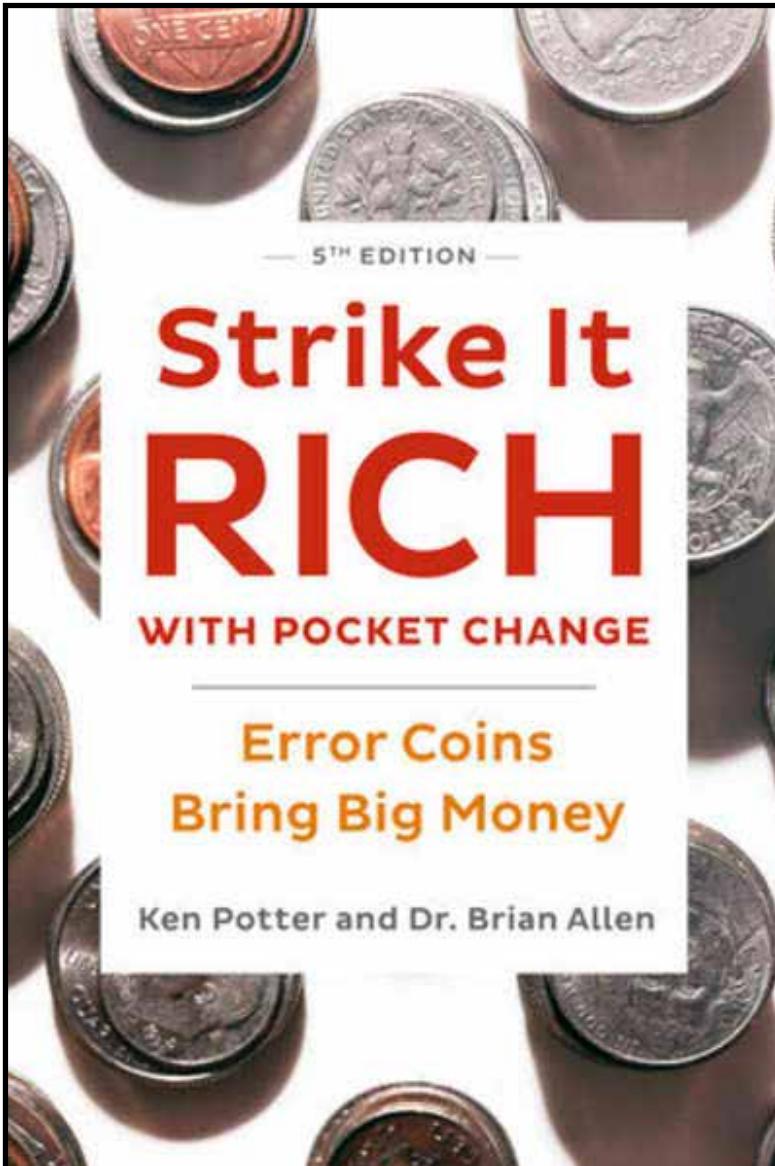

Strike It Rich With Pocket Change

Error Coins Bring Big Money

by Brian Allen & Ken Potter
NEW 5th Edition

It takes a keen eye to spot them - and a little know-how - but errors on coins produced by the U.S. Mint occur every year. And these errors can be worth a fortune to coin collectors. Strike It Rich with Pocket Change shows the reader how to detect errors, what to look for and how to cash in on them. This book has a strong appeal for someone with a mild to

dedicated interest in coins, while drawing upon the treasure hunter in all of us - anyone who is looking for a hobby that does not require a great up-front investment, yet offers the potential of discovering valuable rarities. Any collector who has completed the standard set of a type or series now has an opportunity to broaden the scope of that collection.

Visit penguinrandomhouse.com for more information.

MINTERRORNEWS GLOSSARY

Unique Branch Mint Proof 1891-O Seated Liberty Dime NGC PF 66

What Are Unique Coins?

Many numismatists, dealers and collectors consider unique coins to be the most coveted, prized and valuable. Many of these unique coins were documented by the U.S. Mint or one of the Mint Branches, while others have no documentation but there are logical assumptions as to how and why they were struck.

Some of the most famous U.S. coins were struck under mysterious circumstances and the story behind their production adds to their rarity, prestige and value. Examples are coins struck in proof where only one example is known, a special specimen striking struck with polished dies, while others are patterns, trial strikes, or mint error coins.

MIKE BYERS INC

MIKEBYERS.COM

U.S. & WORLD MAJOR MINT ERRORS

Mike Byers has been a professional numismatist for forty years. He is one of the largest dealers handling U.S. Gold Coins, Patterns and Rarities certified by PCGS and NGC. He has handled major coin collections and attends every major coin convention. Mike Byers carries an extensive inventory as well as solicits want lists and is always looking to purchase fresh inventory and collections.

Mike Byers was a consultant to ANACS for Mint Errors from 2000 to 2006. He is also the Publisher and Editor of Mint Error News Magazine and the Mint Error News Website that was founded in 2003. In 2009, Mike Byers published his first book, *World's Greatest Mint Errors*, which received the NLG Award for Best World Coin Book and is available on Amazon.com.

Mike Byers is a life member of ANA since 1985, a charter member of NGC and a featured dealer/member of PCGS. He is also a life member of the Central States Numismatic Society and the Florida United Numismatists. He is a member of CDN Exchange (BYRS).

Mike Byers was born in the coin business attending coin shows since he was six years old. When he was seventeen, he issued his first coin catalog. He has been a Market-Maker in U.S. Gold Coins and a dealer in major mint errors. In 1987 he offered limited partnerships and rare coin funds. He has written articles for The Coin Dealer Newsletter and has been featured on the front page of Coin World numerous times with his numismatic rarities. Mike Byers is a contributing author on mint errors for CoinWeek. He also assisted with the mint error section of Coin Facts on the PCGS website. You can visit Mike Byers and view his rarities at the ANA, Central States, FUN show and the Long Beach Coin Expo.
